SUMMARY

Full Stack Web Developer with a background in education, customer service and management. Known as an organized, detail-oriented, innovative problem-solver passionate about coding and debugging to ensure a more intuitive end-user experience. Excited to leverage skills in the future as part of a fast-paced, quality-driven team, in order to build better experiences on the web. Earned certificate from the University of Kansas Full Stack Boot Camp.

TECHNICAL SKILLS

Languages: Express, HTML, JavaScript, jQuery, Node, React.js
Databases: MongoDB, SQL
Tools: Adobe CreativeSuite, AJAX, API Calls, Axios, Bootstrap, Bulma, CSS, GitHub, Heroku, JIRA, JSON, Microsoft Office, Node.js, Object Oriented Programming, Visual Studio Code

PROJECTS

Destination Globetrotter | **GitHub Repository** | **Deployed Application**
- Completed third project for Boot Camp, working with three other students. Destination Globetrotter is the travel planning app for High School Reunions, Family Reunions and other group travel! Discover a collaborative approach to travel planning through in-app group messaging and personal invites to trips! Search for flights and bookmark them to share with the other members of your group!
- Involved in full stack development and complete software development lifecyle, including database creation and messaging functionality.
- Site includes use of Axios, bCrypt, Bootstrap, Component-based Development, CSS, Express, HTML, Node.js, Path, Passport, PubNub API, React, Sequelize, SQL and Tequila API .

Cocktail_Coterie | **GitHub Repository** | **Deployed Application**
- Completed second project for Boot Camp, working with three other students. User can search for cocktails and schedule a virtual cocktail party. The party invite includes the chosen cocktail, with ingredients, directions for making the cocktail and a picture of it, input field for a Zoom or GoogleMeet link, with an auto-generated link for the invitation to be included in an email or text messages.
- Involved in full stack development, including database creation and functionality using SQL.
- Site includes use of AJAX, Axios, bCrypt, CSS, Express, Handlebars, HTML, JavaScript, SQL, Node, ORM, Passport and The Cocktail DB API .

SpaceX/NASA Flight Data | **GitHub Repository** | **Deployed Application**
- Completed first project for Boot Camp, working with three other students. Pages display carousel of NASA and SpaceX images and interactive timelines with key dates for each. Data page displays random project information for NASA and a dropdown of SpaceX missions that tie in historical weather data.
- Responsible for front end development. Incorporated style for application, including SpaceX colors recommended by their media style guidelines, and fonts across site. Populated site with interactive timeline and carousel.
- Site includes use of AJAX, Bulma, CSS, HTML, JavaScript, jQuery, moment.js and SpaceX and NASA APIs.

Google Books Library | [**GitHub Repository**](#) | [**Deployed Application**](#)
- Project is a interactive book search using the Google Books API. Users can view books and save them to their library for future reference.
- Responsible for front and back end development. Designed the look and feel of the application including the colors and font.
- Site includes use of API Calls, Axios, Bootstrap, CSS, Heroku, HTML, JavaScript, mongoDB, node.js, and React.

EXPERIENCE

Vice-President Customer Service   2013 – 2020
Uhlig LLC   Overland Park, KS
Liaised directly with two corporate offices regarding submission of artwork, story files, upcoming special projects, and deadlines. Worked with newsletter templates, design and functionality. Prepared written communications for customers in form of emails and User Guides. Updated customer database and processed orders in FileMaker Pro or proprietary software.

Key Accomplishments:
- In conjunction with software team, managed projects from Customer Service side to develop and provide system upgrades to customers.
- Successfully collaborated with an experienced software team developing a proprietary, web-based interface for 600 users. Worked directly with corporate client to explore design and requirements of website. Delivered MVP iterations to client on a regular basis. Completed testing of new website and onboarding of customers. Worked well under tight deadlines and completed onboarding 4 weeks ahead of deadline.

Notices Production Manager   2012 – 2013
Uhlig LLC   Overland Park, KS
Analyzed ordering history to determine production staffing levels and inventory needed on a monthly basis. Managed production deadline and on-time delivery of products. Assisted fulfillment team with print and mailing of customer documents.

Key Accomplishments:
- Developed written workflows and systems processes for new business projects taken on during this time, improving processing efficiencies and training.
